SOVIET JOURNAL OF COMPUTER AND SYSTEMS SCIENCES

(formerly Engineering Cybernetics)

CONTENTS FOR 1990

Number 1

	English Page	Russian Page
V.S. Savchenko: One Method of Numerical Solution of Problems with Special Optimal Controls	1	70
T.N. Danil'chenko, Yu.P. Ivanilov, and Sh.D. Makhmudova: Investigation of Equilibrium Situations in Differential Games by the Method of Freedom from Constraints	7	12
I.S. Litvinchev: Decomposition of Large Dynamical Systems with Interconnections (A Survey)	15	20
Dzh.A. Babayev, G.P. Veliyev, K.Sh. Mamedov, and M.M. Yusifov: Solution of Two Types of Knapsack Problem	24	29
S.P. Makeyev: Approximation of Fuzzy Relationships by Fuzzy Invertible Quasiseries	31	37
A.A. Gvozdik: The Choice of Best Objects on the Basis of Finding Compatible Information About Preferences	36	49
V.I. Kukhtenko, Ye.V. Orlov, and V.I. Timoshchenko: A Unified Approach to Control of Linear Stochastic Systems with Ransom Parameters. Part I	43	56
V.Ye. Belozerov: The Problem of Synthesizing a Static Output Feedback for Linear Automatic Control Systems	52	65
O.N. Solomakha: Realization of Nonlinear Automatic Control Laws Using Microprocessors	56	70
P.D. Krut'ko: Conversion of Lyapunov's Direct Method in Problems of Dynamical System Control	64	78
N.V. Nikitin: An Approximate Method for Solving Problems of Interruption of Control When There Are Small Acting Noise Intensities	76	90
I.M. Islamov: An Asymptotically Optimal Method of Solving an Ill-Posed Problem of Identifying a Linear System	86	100
Yu.P. Petrov: Guaranteed Control in Linear Systems	92	105
V.A. Vorob'yev and N.V. Lakhodynova: Bounds on the Reliability of Homogeneous Computational Structures	96	110
A.M. Stefanov and V.A. Fatkhi: Diagnostic Simulation in the Language of Modified Petri Networks	101	115
L.Ch. Gamkrelidze and Ye.N. Ostroukh: A Method of Solving Discrete Problems of Multicriterial Optimization	109	150
O.A. Babich and O.Yu. Pershin: Synthesis of an Optimal Production-Transporation System with Acyclic Graph of the Communication Network and Related Problems	115	156
Ye.A. Sotnikov: Computational Complexity of Optimal Redistribution of Indivisible Resources	121	162
V.B. Larin: Frequency Methods of Synthesizing Optimal Linear Control Systems	128	80
V.B. Kolmanovskiy and G.Ye. Kolosov: Approximate and Numerical Methods for Synthesis of Optimal Control of Stochastic Systems	140	67

A.M. Stefanov and V.A. Fatkhi: Diagnostic Simulation in the Language of Modified Petri Networks	101	115
L.Ch. Gamkrelidze and Ye.N. Ostroukh: A Method of Solving Discrete Problems of Multicriterial Optimization	109	150
O.A. Babich and O.Yu. Pershin: Synthesis of an Optimal Production-Transporation System with Acyclic Graph of the Communication Network and Related Problems	115	156
Ye.A. Sotnikov: Computational Complexity of Optimal Redistribution of Indivisible Resources	121	162
V.B. Larin: Frequency Methods of Synthesizing Optimal Linear Control Systems	128	80
V.B. Kolmanovskiy and G.Ye. Kolosov: Approximate and Numerical Methods for Synthesis of Optimal Control of Stochastic Systems	140	67

	English Page	Russian Page
Yu.Ye. Malashenko and N.M. Novikova: The Generalized Problem of Analyzing a Multicommodity Network	154	137
BRIEF COMMUNICATION		
I.V. Tarasov and S.O. Yangel': Choice of Criterion for Mathematical Processing of Single-Factor (Multifactor) Models for a Set of Experimental Data	168	221

Number 2

V.N. Vagin, E.V. Golubev, and V.Ye. Klimov: Formalizing the Task of Synthesizing the Structures of Mechanical Objects	1	190
S.Yu. Simaranov: Adaptive Control of the Tracking Mode Parameters in Multichannel Information Systems	9	127
V.M. Babushkin: A Method for Estimating Efficiency of Technical Diagnosis Facilities Based on Simulation	14	142
I.Ye. Vol'fson: Rational Distribution of Resources in Flow Problems with Allowance for Reliability	21	169
A.P. Tizik and V.I. Tsurkov: Optimal Channel Distribution in Communications Networks	24	153
Yu.R. Kotta: Linearization of Linear-Analytic Systems by the Method of Right-Inverse Systems. The Effects of Discretization	32	160
L.D. Akulenko, L.K. Lilov, M.E. Lorer, and S.A. Mikhaylov: Orientation of the Gripper of a Loaded Anthropomorphic Electromechanical Manipulator	40	192
A.I. Grudev: Mass and Size Optimization of the Arm Parameters of an Anthropomorphic Robot Manipulator	49	215
A.N. Averkin and M.Kh. Nguyen: Utilizing Fuzzy Relations in Knowledge Representation Modules	55	20
S.N. Rezanov: On a Generalization Method for Semantic Networks in Systems for Controlling an Energy Complex	69	55
V.K. Finn: On a New Variant for Automatic Hypothesis Generation in Expert Systems of the DSM Type	76	63
L.B. Nisenboym: Logic of Metric Time Relations	84	76
A.F. Blishun: Fuzzy Inductive Training Models in Expert Systems	94	94
S.I. Akimov: Fuzzy Training Data in Structural Pattern Recognition	105	105
A.A. Gvozdik: Ordering of Objects Based on Extracting Compatible Information About Preferences	114	113
V.A. Barishpolets and S.A. Kobzar': A Numerical Method of Analyzing a Network Model with Stochastic Structure and Random Operation Durations	119	229
BRIEF COMMUNICATIONS		
Ye.K. Gordiyenko and V.Yu. Kirillov: Implementation of a Search Procedure in the "VOLNA-O" Language in a Homogeneous Computer Environment	131	218
V.A. Vyazgin: Fuzzy Estimates of Alternatives in Hierarchical Planning Systems	136	172
N.S. Kukushkin: On Information Transmission for Making Control Decisions	142	178
V.S. Gordon: Parallel Algorithm for Minimizing the Maximum Penalty for Servicing Requests by a Single Server	145	181

	English Page	Russian Page
L.V. Avgul' and V.P. Suprun: Decomposition of Boolean Functions Based on Polynomial Expansion	151	187

Number 3

V.V. Araksyan, N.A. Gerasimov, and A.M. Lukatskiy: Adaptive Dialogue Models in Man-Machine Systems	1	161
S.G. Sedukhin: Design of Systolic and Wave-Matrix Structures for Solving the Algebraic Problem of Path Determination	9	123
M. Vukobratovic and D. Stokich: Software Support of the Dynamic Approach to the Control of Flexible Manufacturing Modules	18	167
P.D. Krut'ko: Algorithms for Acceleration-Based Control of the Motion of Mechanical Systems	26	178
V.V. Martynov: USC-4, A Special-Kind Language for the Representation and Transformation of Knowledge	40	71
A.I. Petrov and G.O. Stetsko: Synthesis of Self-Organizing Stochastic Control Systems That Adapt to Changing Perturbations Characteristics	45	56
V.I. Finyagina: Modeling a Mobile Control in Distributed-Parameter Two-Dimensional Systems	57	68
A.V. Kim and A.I. Korotkiy: Dynamic Modeling of Perturbations in Parabolic Systems	67	78
I.S. Litvinchev: Decomposition in Control of Systems of the Hyperbolic Type with Crossed Connections	74	85
A.N. Golovinskiy and A.I. Naumov: Analytical Solution of Problems of Optimal Trajectory Control of an Aircraft	82	93
N.Ye. Zubov: Algorithms for Systems of Automatic Trajectory Control of Spacecraft Approach	90	101
V.I. Babitskiy, A.S. Kovaleva, and A.V. Shipilov: Optimal Control of the Drive of a Cyclic Machine	97	108
E.K. Lavroskiy and A.M. Formal'skiy: Stabilization of the Angular Position of an Elastic Rod	104	115
S.F. Burdakov: Connected Control of Robot Drives in a Positioning Process	114	124
G.V. Kostin: Dynamics of Controlled Rotations of a Loaded Elastic Link in a Manipulational System with an Electromechanical Drive	120	130
S.K. Korovin, A.L. Nersisyan, and Yu.Ye. Nisenzon: Control of Linear Uncertain Objects by the Output	129	67
A.A. Krasovskiy: A Dual Control and Identification Problem in the Class of Piecewise-Linear Models	136	74

BRIEF COMMUNICATIONS

I.V. Pavlov and I.A. Ushakov: Calculation of Reliability Indices for Complex Systems with Restorable Elements	146	170
V.A. Gerasimov and M.G. Dmitriyev: Optimal Control in Operational Planning and Control	154	177

Number 4

M.I. Kanovich: Monadic Horn Bases of Knowledge in Expert Systems	1	14
V.Yu. Leonov and V.I. Tsurkov: Optimal Control in an Equipment-Restoring System	8	3

	English Page	Russian Page
A.Ye. Rolikhin and V.I. Toloknov: Identification of Dynamic Nonlinear Systems of One Class by the Method of Projection Functionals	15	10
F.G. Garashchenko and L.A. Pantaliyenko: Investigation of Problems in Sensitivity Theory by Practical Stability Methods	23	17
S.A. Grishin: Synthesizing Multidimensional Control Systems with Specified Dynamics	32	26
A.I. Samylovskiy: Optimization of a Multidimensional System Based on a Coordinated Analysis of Its Elements	40	34
V.N. Kozlov and V.N. Shashikhin: Synthesis of Large-Scale Systems with Delay in the Cross Connections	45	39
A.I. Kibzun and V.V. Malyshev: Probabilistic Optimization Problems	52	46
Ye.M. Potapenko: Minimizing Compensator Dimensionality in Oscillatory System Control	61	26
A.M. Malyshenko: Determining the Causality Indices of Controlled Dynamic Systems	67	38
A.N. Katulev and A.G. Perevozchikov: Determining the Weight Functions of Nonstationary Pulse Systems by the Minimax Criterion	72	37
V.V. Malyshev and P.V. Pakshin: Applied Stochastic Stability and Optimal Stationary Control Theory (Survey). Part I	78	42
Ye.V. Yefimov and I.Ye. Kazakov: Optimal Filtering in Random-Structure Dynamic Systems with a Meter Controlled by an Indicator	102	85
Yu.V. Kim: An Approach to Suboptimal Filtering in Applied Problems of Information Processing	109	92
V.M. Aleksandrov and S.B. Sanina: Optimization of a Scheme for Live Tests and Mathematical Simulation of a System in Order to Bring It to an Extremal Regime	124	108
M.G. Kolobov: Adaptive Estimation of the State of a Dynamic System Under Uncertainty Conditions	134	119
A.L. Lebedev: Problems of Ideal Observation of Certain Classes of Discrete Systems	140	125
V.A. Barishpoletz and S.A. Kobzar': An Algorithm for Analysis of a Network Model with Stochastic Structure and Random Operation Duration by Means of a Numerical Method	146	147
Yu.A. Krysov: On Certain Nonlocal Properties of Optimum Functions	156	157
I.L. Averbakh: An Additive Method for Optimization of Two-Stage Stochastic Systems with Discrete Variables	161	162
V.V. Araksyan, N.A. Gerasimov, and A.M. Lukackiy: Adaptive Dialogue Models in Man-Machine Systems	166	161

Number 5

E.Kh. Tyugu: Integration of Knowledge	1	3
V.A. Baklunov, N.A. Skripkin, and M.I. Sudeykin: Forming a Knowledge Base and a Route Assignment for an Autonomous Transport Robot	11	45
A.V. Yazenin: A Hybrid Expert Planning System	21	162
N.P. Viktorova, Ye.A. Mosaleva, and Ye.V. Shugayeva: HELPS—A System for Automating the Design of Complex Program Systems	27	168
A.D. Zakrevskiy: On the Theory of Parallel Logical Control Algorithms	36	179
A.I. Adamatskiy and V.A. Bronnikov: Identification of Additive Cellular Automata	47	200

	English Page	Russian Page
A.A. Krasovskiy: The Optimal Instructor Concept and Automation of Teaching on Training Simulators	52	139
N.A. Starodubtsev: The Synchronization Problem in an Asynchrous System. II. Conflicts and Their Elimination	58	145
F.R. Sosnin: Optimizing the Search Procedure in Controlling the Quality of Products by Introscopy Methods	63	165
P.D. Krut'ko: New Structures of Adaptive Algorithms for the Control of Automatic Systems	68	3
B.G. Il'yasov, Yu.S. Kabal'nov, and V.V. Kolushov: On Constructing Stability Regions of Multiply-Connected Automatic Control Systems in the Amplitude-Phase Characteristics Plane of Their Separable Subsystems	82	18
E.V. Tsoy and D.B. Yudin: The Direct Problem of Synthesis of Knowledge in Decision-making Theory	90	130
B.B. Kolotilin: The Problem of Optimal Design of the Structure of a Hierarchical Distributed Data Processing System	99	140
A.Kh. Giorgadze, L.V. Makarevich, and A.A. Matevosyan: Logical Aspects of Constructing Cellular Optical Processors	105	167
I.P. Adamchuk: System for the Automatic Design and Interpretation of Expert Algorithms of Program-Logic Control of the Operational Modes of Power Blocks	116	178
S.I. Bayda, V.V. Kudryavtsev, B.Ye. Chertok, and V.I. Shutenko: Digital Electrohydraulic Drive in the Control System of the "Energiya" Carrier Rocket	121	183
N.N. Bolotnik and F.L. Chernous'ko: Optimization of Manipulation Robot Control	127	189

Number 6

N.V. Gorbachev, A.V. Safunov, and A.G. Shukhov: Synthesis and Optimization Algorithms Based on the Inverse Problem Concept	1	3
Yu.V. Sadomtsev: Static Controllability of the Output of Linear Stationary Controlled Systems	13	15
V.Ye. Barskiy: Formation of Terminal Control Systems that are Stable	22	23
O.A. Babich: A New Form of Solution of the Linear-Quadratic Problem in Optimal Control Theory	31	33
F.A. Aliyev, B.A. Bordyug, and V.B. Larin: Factorization of Polynomial Matrices and Separation of Rational Matrices	47	49
V.B. Kolmanovskiy and V.R. Nosov: Control of a Certain Bilinear System	59	60
A.B. Piunovskiy: Problems of Optimal Infinite-Horizon Control	65	66
V.A. Leonov and B.K. Poplavskiy: A Method of Linear Transforms for Identification of Dynamic Systems	72	73
A.G. Moiseyev and M.K. Naralenkov: Discrete Quasi-Optimal Estimation Algorithms for Continuous Processes with Measured Parameters	80	91
V.V. Malyshev and P.V. Pakshin: Applied Theory of Stochastic Stability and of Optimal Stationary Control. Survey. Part II	86	97
A.V. Kolnogorov: Estimates of the Minimax Risk in Stationary Media	109	153
V.I. Tsurkov and A.V. Shapovalov: A Two-Level Procedure in Problems of Control of Disperse Systems	112	156
S.A. Brykalov: Stationary Temperature Distributions in Systems with Continuous Feedback and Control	118	162
Yu.A. Belov and S.V. Shafranskiy: Decomposition of the Choice Problem	122	173

	English Page	Russian Page
A.G. Perevozchikov and A.M. Snaksarev: Optimization of Search Trees in Problems of Structural Synthesis of Complex Technical Systems	127	178
V.V. Glushchenko: A Functional-Decompositional Representation of Complex Technological Systems	134	184
V.Yu. Leonov: Iterative Grouping in Problems of Optimal Control	137	187
N.Ye. Zubov: Algorithmic Implementation of an Automatic Regime for Orbital Orientation of a Spacecraft	143	193
Yu.F. Golubev, Ye.V. Degtyareva, and R.Z. Khayrullin: The Method of Sequential Linearization in the Problem of Search for an Optimal Step Cycle of a Walking Apparatus	152	214
